

VOLUNTEERS WANTED:

Do you like working outside?

Are you interested in helping our forests?

Do you have some extra time?

The Northampton Department of Public Works-Water Division is seeking volunteers to assist with invasive plant control efforts on watershed property.

The City's watershed forests provide us with cool, clear drinking water. Invasive plants pose a challenge because they outcompete new forest growth.

Volunteers will help pull, cut and remove these plants. Just a couple of hours a month can make a difference!

Help our forests thrive!
